# 1 The concept

The SEMRUSH logo is centered on a dark purple background. The word "SEMRUSH" is written in a bold, white, sans-serif font. The letters "SEM" are positioned over a light blue circle, while "RUSH" is positioned over a light green cross-like shape. To the right of the green shape is a yellow circle, and at the bottom right is a light purple circle. In the top left corner, there is an orange circle. Several orange curved lines are also visible in the bottom left corner.

SEMRUSH

Marketers analyze, create, improve and inspire. Their work is a constant motion of ideas, graphics, diagrams and numbers. When you visualize all these components, you end up with an infinite mechanism, where all the elements are crucial and cohesive.

The Semrush symbol is a fireball. This is the energy that fuels the marketing mechanism.

The friendly and vivid character of the brand communication is articulated by the vast color palette and bold, yet soft graphics. The clarity and precision of the marketing mechanics are represented by the sharp inner edges and the sharpness of the composition itself.

The logo  
Protective field

At the top, on the right, and at the bottom, the protective field is equal to the width of the glint. On the left, it is equal to 2/3 of its width.

The logo's height is equal to a lowercase letter in the headline.

The logo should not be used in a large scale.

It is recommended that the logo be used in the hot orange color (see page 36).

It is permitted that the logo be used in white color where appropriate.

The logo should not be used in any other color but hot orange, black and white (page 36).

The logo  
Usage principles

Background

When the background is white, the basic version of the logo is used.

On the main background colors, the inverted version of the logo is used.

On the additional background colors, the inverted version of the logo is used.

On the photo backgrounds, the inverted version of the logo is used.

The logo is aligned with the wordmark in the center of the letter S. The height of the inner circle of the logo is equal to the height of the letter S. The distance from the right edge of the logo to the wordmark is equal to the width of the glint.

Lockup  
Protective field

At the top, on the right, and at the bottom, the protective field of the lockup is equal to the height of the letter H. On the left, it is equal to 2/3 of its width.

2.2

Lockup

Usage principles

Background

When the background is white, the basic version of the lockup is used. On the main background colors, additional background colors and photo backgrounds, the inverted version of the lockup is used

White background					
Main colors					
					
Additional background colors					
					
Photo backgrounds					
					

On media where the message is more important than the branding, the lockup is positioned in the bottom left corner.

On media where the branding is more important than the text, the wordmark is positioned in the top left corner.

2.2

Lockup  
Usage principles

As with the logo, it is recommended that the lockup be used separately from key visuals on branded media. However, if such a combination is required, the following rules must be adhered to.

The size of the lockup must not exceed the diameter of the mechanism's shape.

The logo should not be placed on top of other shapes or key visuals. The wordmark may be placed on top of other shapes or key visuals.

Basic version

Inverted version

The logo is placed in a line with other brands' logos and doesn't form too wide of a space.

The vertical version is not to be used for branding media.

Color system

Proportions of usage

The usage proportions of the colors depend on the audience:

Brand territory — for audiences familiar with the brand (internal communication, social networks).

Foreign territory — for audiences not yet familiar with the brand (exhibition materials, promo websites, advertising).
